M Y H O M E

Rocal provides the warmth and the touch of class your home needs,

with our wood heating systems adapted to any space, environment or requirement.

We believe in a sustainable future and trust in renewable energy sources to bring comfort to your home.

# Rocal

Rocal has had the same vocation since it was founded in 1982: to create a range of products—metal fireplaces, insert modules, hearths, barbecues...— that lend your home all the comfort of a wood fire.

Our factory is in Centelles, just outside Barcelona.

Our more than 30 years' experience in the home heating industry are the best guarantee of our products' quality.

Backed by the best human and technical team, Rocal is growing daily and expanding its horizons on a national and international scale.

**Quality and design**

Rocal offers a wide range of products for you to choose the one that best suits your home. Our fireplaces are the result of hi-tech manufacturing methods combined with handcrafted finishes. A process in which every attention is paid to detail and only the highest quality materials are used.

We aim to provide functional design that is pleasing to the eye. We want our products to fit in with your projects.

**Innovation and efficiency**

We are committed to continuous product improvement, innovation and efficiency, and that has put our range right out in front. We use the latest technology to achieve optimal performance with minimal emissions, which also means considerable fuel savings.

**Guarantee and safety**

Feel safe in the knowledge that our fireplaces are long-lasting and that our products are tested in compliance with European quality standards.

One of our priority objectives is to ensure safety in your home through quality products and professional distributors and fitters.

**Wood**

An ecological, economical biomass fuel. A natural fuel that man has used since time began. It is the renewable energy source par excellence. Using wood instead of fossil fuels reduces the greenhouse effect, as it does not increase the carbon dioxide in the atmosphere. Furthermore, wood is easy to find, relatively cheap to obtain and contributes to clearing the forest floor.

Don't forget that wood burns slowly and elegantly and provides that special touch that makes a house a home.

**How do you calculate the output power your dwelling needs?**

Hebar

## STOVE-OVEN-BARBECUE

# Hebar

Hebar is one of the most complete and efficient products on the market and thanks to its high efficiency, it also has the ability to heat a large area. The same inertia of the stove keeps the heat for cooking in the oven until about 3 hours after the last loading.

### STOVE FEATURES:

External air intake.  
Double combustion.  
Primary and secondary air control.  
Front ash removal.  
Bottom hinged door allows depositing the grid and avoid soiling.

### OVEN FEATURES:

Vitrified steel Oven.  
Steel grill and vitrified steel plate.  
Capacity: 78 litres  
Thermometer included

### BARBECUE FEATURES:

Stainless steel grill
